

Vatsal Chandrani

B.Tech – Information Technology

I enjoy building software from the ground up, from database design to backend architecture and intuitive user experiences. Passionate about creating software experiences that combine clean engineering with thoughtful and innovative design.

EDUCATION

Dharmsinh Desai University

CPI: 8.38

2023 - 2027

Nadiad, Gujarat

TECHNICAL SKILLS

Languages: C, C++, Java, JavaScript

Web Stack: Node.js, Express.js, Spring Boot, Spring Security, REST APIs, React

Databases & Caching: PostgreSQL, MySQL, MongoDB, Redis

Developer Tools: Git, GitHub, Postman, VS Code, IntelliJ IDEA

Core Expertise: Data Structures & Algorithms, OOP, Operating Systems, Database Design, System Design Concepts

PROJECTS

CampusConnect – Multi-College Student Engagement Platform | *Spring Boot, React, PostgreSQL, Redis* 🔗

- Recognized fragmented campus communication across WhatsApp, emails, Google Forms, and isolated portals, leading to poor information discovery and low student engagement.
- Built a scalable multi-college communication platform centralizing **clubs, announcements, events, digital newspapers, research paper publishing, one-click event registration, role-based approvals**, and cross-campus content sharing.
- Implemented **Spring Security**-based authentication and fine-grained authorization with **6-roles dashboard**, a **modular architecture**, **Redis caching**, and a **PostgreSQL-backed relational data model** for scalable and secure operations
- Live:** campus-connect.xyz

BidVault – Real-Time Online Auction Platform | *Node.js, Express.js, React, Socket.IO, MongoDB, Redis* 🔗

- Built a **full-stack online auction system** with **real-time bidding** using **Socket.io**, supporting **live leaderboard updates**.
- Developed an **automatic bidding engine** capable of safely resolving **concurrent bids** using **Redis locks**.
- Implemented the complete **auction lifecycle**, including **JWT-based authentication**, media uploads via **Cloudinary**, auction scheduling, and participation workflows.
- Live:** bidvault.auctions

CityStore – City-Wide Business Discovery Platform | *Database Design, PostgreSQL* 🔗

- Architect the database architecture for a **city-wide business discovery platform** supporting retail stores, service providers, restaurants, and hybrid businesses through a **modular relational data model**.
- Designed a **normalized PostgreSQL schema** with **30+ entities** to model business onboarding, customizable business modules, product/service management, and customer interactions.

AI Meet Summarizer – AI-Powered Chrome Extension | *JavaScript, Manifest V3* 🔗

- Identified the challenge of retaining **key discussions, decisions, and action items** during long Google Meet sessions, where manual note-taking often disrupts participation.
- Built an **AI-powered Chrome extension** that automates meeting transcription and summarization, reducing manual **note-taking** and providing quick access to **AI-generated meeting reports**.
- Engineered a real-time caption processing pipeline using **Manifest V3** and `MutationObserver` to capture live meeting captions, eliminate duplicates, and generate context-aware meeting reports through a **multi-provider AI layer**.

An Interactive IDE-Style Portfolio | **Live** - vatsal-chandrani.me 🔗

POSITION OF RESPONSIBILITY

Founder & Lead

2025 – 2026

Programming Club

- Founded and led the Programming Club, fostering a coding culture through contests and collaborative learning.
- Successfully organized 5 competitive programming events and led post-contest problem-solving sessions.

ACHIEVEMENTS

- Solved **950+** DSA and competitive programming problems. Profile: vatsalchandrani
- Reached **1200+ rating (Pupil)** on Codeforces and solved **300+ problems**. Profile: vasuchandrani
- Achieved **1650+ rating (top 17%)** on LeetCode and solved **400+ problems**. Profile: vasuchandrani
