

Vatsal Chandrani

B.Tech – Information Technology

I enjoy building software from the ground up, from database design to backend architecture and intuitive user experiences. Passionate about creating software experiences that combine clean engineering with thoughtful and innovative design.

Education

Dharmsinh Desai University	2023 - Present
CPI: 8.38	Nadiad, Gujarat
Alpha High School (GHSEB)	2022 - 2023
Percentage: 76.76	Junagadh, Gujarat
Alpha Vidhya Sankul (GSEB)	2020 - 2021
Percentage: 90.66	Talala-Gir, Gujarat

Technical Skills

Programming Languages: C, C++, Java

Web Stack: Spring Boot, Spring Security, Node.js, Express.js, REST APIs

Databases: PostgreSQL, MySQL, MongoDB, Redis

Tools: Git, GitHub, Postman, VS Code, IntelliJ IDEA

Fundamentals: Data Structures & Algorithms, DBMS, OOP, Operating System, System Design Concepts

Projects

- CampusConnect – A Centralized College Communication Platform** | *Spring Boot & Security, PostgreSQL, Redis, React* 🔄
- Created a modular platform to improve communication across college campuses with 20+ interconnected entities supporting clubs, announcements, events, digital newspaper, and research paper publishing.
 - Enabled authentication and authorization for 6 user roles with role-specific dashboards and workflows.
 - Live:** campus-conect.xyz
- BidVault – Online Auction System** | *Node.js, Express.js, JWT, Socket.io, MongoDB, Cloudinary, Redis, React* 🔄
- Implemented real-time bidding using Socket.io supporting synchronized live leaderboard updates.
 - Developed an automatic bidding engine capable of resolving concurrent bids safely using Redis locks.
 - Built a complete auction lifecycle including authentication, media uploads, auction scheduling, and participation.
 - Live:** bidvault.auctions
- CityStore – City-Wide Business Discovery Ecosystem** | *DBMS* 🔄
- Designed a city-wide platform that enables users to discover and explore local businesses across multiple categories.
 - Modeled PostgreSQL schema consisting of 30+ normalized entities supporting multi-tenant business discovery.
- AI Meet Summarizer – Chrome Extension** | *JavaScript, Manifest V3, Gemini API* 🔄
- Developed a Chrome Extension using Manifest V3 that captures Google Meet captions through MutationObserver.
 - Implemented a caption stabilization algorithm to eliminate duplicate transcript generation.
 - Integrated multiple AI providers to generate meeting summaries, Q&A extraction, action items, and Markdown reports.
- Portfolio - An Interactive IDE-Style Portfolio** | **Live -** vatsal-chandrani.me 🔄

Position of Responsibility

- Founder & Lead** 2025 – 2026
- Programming Club*
- Founded and led the Programming Club, fostering a coding culture through contests and collaborative learning.
 - Successfully organized 5 competitive programming events and led post-contest problem-solving sessions.

Achievements

- Solved **950+** DSA and competitive programming problems. Profile: vatsalchandrani
- Reached **1200+ rating (Pupil)** on Codeforces and solved **300+ problems**. Profile: vasuchandrani
- Achieved **1650+ rating (top 17%)** on LeetCode and solved **400+ problems**. Profile: vasuchandrani
